

Capstone Project - Battle of the Neighborhoods

Data

The data used for this project will be acquired from the respective cities Wikipedia website pages. The datasets consists of the postal codes, neighborhood names, latitude, and longitude information for each neighborhood. Foursquare API search feature will be used to collect neighborhood venue information. Details about local venues and locality will be provide insight into the qualities of a neighborhood. In addition to Foursquare, various python packages will be used to create maps and machine learning models to further provide insights into our neighborhood battle project.

I used the following datasets from these websites:

Toronto Neighborhoods - https://en.wikipedia.org/wiki/List_of_postal_codes_of_Canada:_M.

Toronto Latitude and Longitude - http://cocl.us/Geospatial_data

New York City neighborhoods - https://geo.nyu.edu/catalog/nyu_2451_34572

New York City Latitude and Longitude = Python Geolibrar
